

The 'Lethal-Psychiatrist' Oratory

'For Initia'

© Glenn Floyd Australia 2016

In the dawning of the past 1900's millennium, - the deepest faith of our new world's daughters and sons, - forged the first steps of our sacred journey of internationally linked humanity and community – and entrusted us, - to never allow its spirit to diminish.

Its emerging spirit and soul was bonded in our only profound wealth; of health; and human rights. These great endowments alone, deliver the only existence worth having.

Its eternal light, - was kindled by the heartfelt and profoundest belief, - that their established legacy of the blessings, - the bounty, - the natural tapestry of their sacred cherished endowment, - remain fertile, forever growing, and the absolute birthright, - of all their children, of all succeeding generations of the world.

We tragically reflect now, approaching the 'second-score' of our new millennium's dawn, - to witness the greatest tragedy. – This spirit, so clearly understood, - so fiercely kindled in deep trust, - so fervently bestowed, - now solely at the hand of lethal-psychiatrists; has now become a faded beacon in the night, - and now drives the deepest international community social destruction, mass deliberate sickness and death rates hitherto unknown in human history. Solely wrought by this lethal psychiatrist-pandemic.

This psychiatrist-pandemic has now destroyed all of the modern societal community health advances and United Nations agreed human rights conventions and Hippocratic Oath traditions to 'not harm' of modern democracy. This now fading hope epoch of great international mutual respect established and deeply cherished and honoured in our Universal Declaration of Human Rights, is “our common shared standard of community goodness for all peoples and all nations.”

The very souls of all people in international community, - now feel utterly sullied to the core. The deepest recesses of good hearts, – are saddened by the fire's dimming. – And the burdensome enslavement of the once great international spirit, - rests heavily upon the conscience. This darkest evil is solely at the hands of psychotropic chemical-psychiatrists pushing deliberately designed-in killing; mass-harm toxic drugs.

Leaders who were entrusted by shared international convention and constitutional moral imperative , - to ensure the brightly burning spirit of world health, human rights and long life and happiness, - in full sail set, - has no horizon, - in their disgrace, - now tests the deepest faith and hope, - of our international founding mothers and fathers and of all our global citizens.

If the quintessence of democratic morality of humanity has been tested ever by shared nations' values, - it has been tested in community interconnection; by deliberate elimination of pandemic health risks and shared respect for human rights. – For it is only an unencumbered free, healthy and human rights protected democracy, - which will truly nurture, - the spirit of the true sacred journey of our most fragile humanity.

These most profound failures of leadership, - and their impact upon our sister's and brother's deep need to always see the beacon of hope, - now brings the bloodied battlefield of democratic morality, - to each citizen's conscience.

Our conflicts are the feral lusts and excesses of the unenlightened Psychiatric-Psychotropic Industrial Complex, - driving personal financial greed agendas through paid-political business lobbying and solely for self-interest. The manipulations of fear used in this tragic farce is the unjust weaponry of demonization of those experiencing 'normal emotional life-crises', and their vilest money scamming lie is 'The Chemical Imbalance of the Brain'.

Moreover, - inviolable human rights and rights to a healthy life and fundamental human rights are because of this bogus pseudo-medical fraud; chillingly subsumed. We cannot - and must not - exclude any section of our global community, and particularly our disabled- for without each of us; - we have no community.

At no other time in our United Nations' history, - have our democratic moral values been so greatly challenged, – our birthright been so tested to its absolute tolerance to endure.

Past world military engagements have forged our collective resistance to the obvious and known external threat. – Our most lethal enemy now exists within, - the insidious unseen, - unlocks the mesh of our human fabric, - by non-awareness of the unquestioned duty of inclusive decisiveness, - at the moral moment. For money, for greed,

We now see rising, - in the people, the genesis of the reborn cherished spirit. Fervently re-ignited by a passion for veneration of our birthright, - so sacredly bestowed. It rises in the world once again, at the hand of the United Nations High Commission for Human Rights and in our noble Convention on the Rights of Persons with Disabilities. It is reborn values of dignity, it is reborn of inspiration and it is reborn of his profound moral leadership.

Now, in our new dawn of the new millennium, - a force of restless conscience stirs, and ascends. – Women and men of courage, - stand to resist together, - peacefully. An energized and growing potency, - so powerful, - its sense of righteousness for all in this fair world, - will not be challenged.

This tidal wave of honour, - standing together for all citizens, and our disabled - to peacefully resist the reckless, indifferent psychiatrist-pandemic killing agenda, is but one measure of the ethical phenomena.

The movement is alive, the movement carries the inherited passions conceived at United Nationhood and now embodied in our Universal Declaration of Human Rights, and in our noble Convention on the Rights of Persons with Disabilities.- and the movement bears the intrinsic and unbridled ferocity of goodness, - fairness; - the hallmark of humanity, *in this vast, lonely universe.*

But above all, - the movement is reborn of the souls of ordinary women and men of our inheriting young generations, of gentle and profoundly gifted emerging leaders such as those who will not allow the psychiatrist-pandemic to lethally deliberately kill as it does now; at horrific levels now exceeding cancer, heart disease and national road deaths.

For it is we world citizens, - who accept the bestowing of our such priceless gifts, - it is we, - who accept the precious flame, - it is we who see there is so much to be done, - to keep it everlasting. -.....it is we, - who refute and reject, - the destructive divisiveness of failed human rights and health leadership. And deliberate psychiatric harm.

Great moral movement is felt throughout our globe once again, - inspiration rises as an unfettered ocean swell, - and common, impassioned people of honour have rallied. – the fervour of democratic morality imperative sunder our own citizens’ leadership, - chronicles the stirring conscience, - the re-birth of the deep spirit of our forebears is witnessed. We must now, - at our ‘second-score’ dawning of this new millennium, and forever, - ensure the new fervent resolve, - born of the brightest spirit of our trusting forebears, is not bestowed in vain.

When the phenomenon of failed leadership, - so virulently pervades the international will, - we, the world’s people, shall demonstrate, that democratic moral leadership, - is the core of moral conscience. – And the promise of our forebears, - shall never again be tarnished.

And the choice, of the people’s democratic philosophy, for the new millennium, - will once more restore the sacred journey of international nationhood for all our worlds people.

And deeply enshrined in its moral code, will be unassailable human rights and rights to health for all people, - guaranteed by explicit charter, - and by United Nations’ birthright and enshrined in our Universal Declaration of Human Rights and our noble Convention on the Rights of Persons with Disabilities.

And its object and intent, - will be to repudiate the rise of money-riven exclusionary leadership, - and hold world and nations governments accountable, - to the hearts and the hands of all the people.

To guarantee this noble franchise in posterity, - we embody ‘The Millennium Precedent’ as the founding principle of our new global democratic charter.

THE MILLENNIUM PRECEDENT

“WHEN THE GOVERNMENT OF THE PEOPLE; ASSUMES THE COLLECTIVE CONSCIENCE OF THE PEOPLE; - AND FALTERS; - THE PEOPLE SHALL ASSUME THE COLLECTIVE CONSCIENCE OF THE UNITED NATIONS GOVERNMENT; - AND RULE.
